XV AVOGADRO MEETING on Strings, Supergravity and Gauge Theories

Wednesday, 18 December 2019 - Friday, 20 December 2019

Aula Magna – Via Partenope

Scientific Programme

VOA & Chiral Algebras in N=2 theories
Speakers: *Federico Bonetti (Johns Hopkins U.) & Guglielmo Lockhart (CERN)*
Aspects of Gauge Theories in 3 & 4 Dimensions

Speakers: *Marco Fazzi (Università Milano Bicocca) & Luigi Tizzano (Stony Brook)*
BMS & asymptotic symmetries in 4d flat space

Speakers: *Luca Ciambelli (ULB) & Céline Zwickel (TU Wien)*
Exact non-BPS AdS/CFT correlators

Speakers: *Andrea Dei (ETH Zurich) & Edoardo Vescovi (Imperial College)*
Anti D3 brane and de Sitter space in String Theory

Speakers: *Niccolò Cribiori (TU Wien) & Marco Scalisi (Leuven U.)*
