Introduction to the Vertexing Group/Tools

## 2<sup>nd</sup> Part

A simple example of Vertexing

# **FastSim Vertexing Tools: an introduction**

1<sup>st</sup> Part

Introduction to the Vertexing Group/Tools

# Vertexing Tools: the group

- At the moment: Gianluca Inguglia- Queen Mary, University of London
  - For any issue related to vertexing you should now refer to me (g.inguglia@qmul.ac.uk)
- April-July: G.I. + 1 undergraduate (D studies at the  $\Upsilon(4S)$ )
- October-March: G.I. + 1 undergraduate (vertexing)
- Someone from the audience may be interested in joining the group

# Vertexing Tools: BABAR Analysis Document(s)-BAD

- The BABAR Vertexing: BAD n.102
- Vertexing supporting document for Summer 2001 Conferences: BAD n.254
- Beamspot determination and use in BABAR: BAD n.013
- <http://mailman.fe.infn.it/superbwiki/index.php/FastSimDoc/VertexingUserGuide>

# Vertexing Tools: BABAR Analysis Document(s)-BAD

- **The BABAR Vertexing: BAD n.102**
  - Vetexers/fitters algorithms,  $\Delta z$  algorithm, etc.
- **Vertexing supporting document for Summer 2001 Conferences: BAD n.254**
  - Additional documents for quality monitoring (BS, TagMix/CP evts comparison, etc.)
- **Beamspot determination and use in BABAR: BAD n.013**
  - Documents for BS studies.
- **<http://mailman.fe.infn.it/superbwiki/index.php/FastSimDoc/VertexingUserGuide>**
  - Vertexing User Guide migrated by Matteo Rama from BABAR. There are few no-working web-links. Once I obtain a BABAR password to access the documentation I will fix these problems.

# Vertexing Tools: aims..

- Perform systematic studies of the vertexing issues for both  $Y(4S)$  and  $\Psi(3770)$  run
- Evaluate performances of different Vertexers/Fitters for both  $Y(4S)$  and  $\Psi(3770)$  run
- For the run at the  $\Psi(3770)$  evaluate vertexing performances for different boost configurations
- Keep up-to-date documentation: wiki, “BAD”..
- Open to new proposals/suggestions

# ***FastSim Vertexing Tools: an introduction***

2<sup>nd</sup> Part

A simple example of Vertexing  
(all preliminary results)

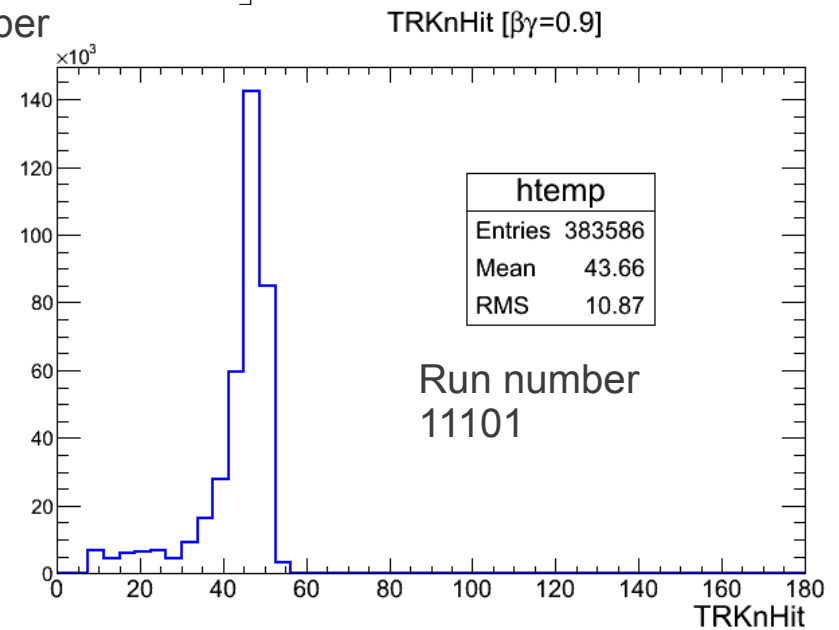

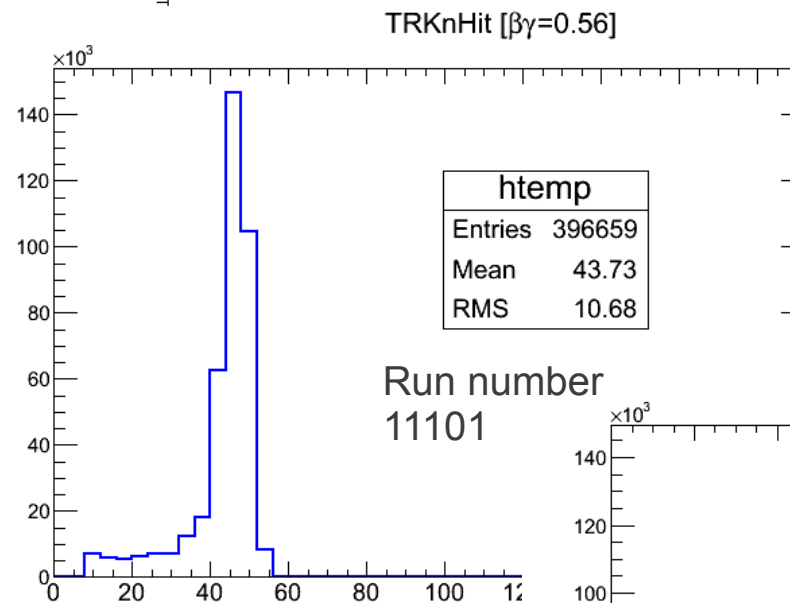

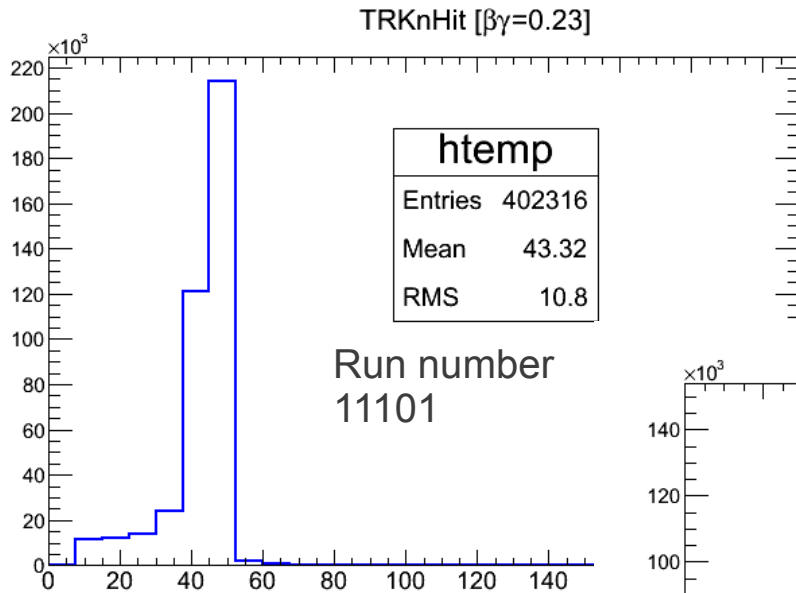

# Total number of hits

$$e^+ e^- \rightarrow \Psi'' \rightarrow D^0 \bar{D}^0 \rightarrow \pi^+ \pi^- K^+ K^-$$

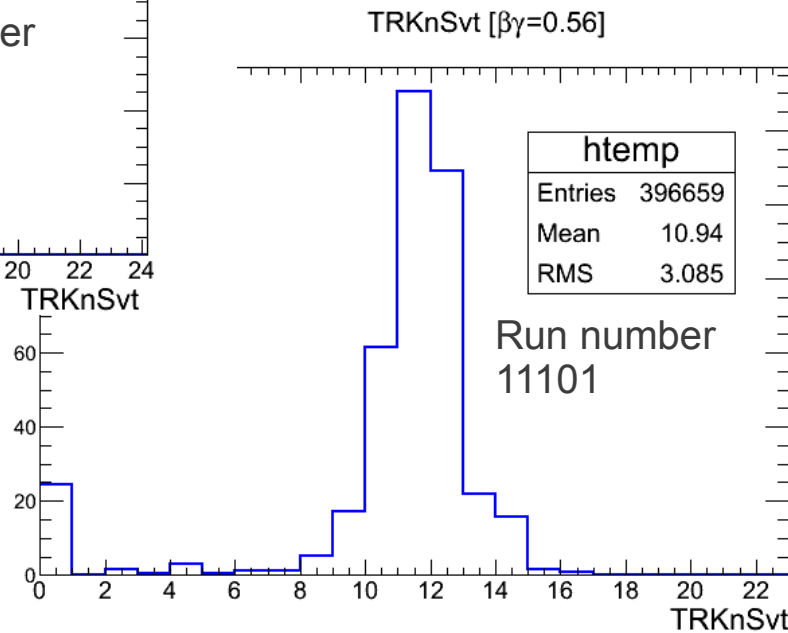

BOOST →

Same events are generated with a different  $\beta\gamma$  factor

Number of entries decreases by  $\sim 1.5\%$  when the boost is increased  $\beta\gamma=0.23$  to  $\beta\gamma=0.56$ , and by  $\sim 5\%$  when it is increased from  $\beta\gamma=0.23$  to  $\beta\gamma=0.9$

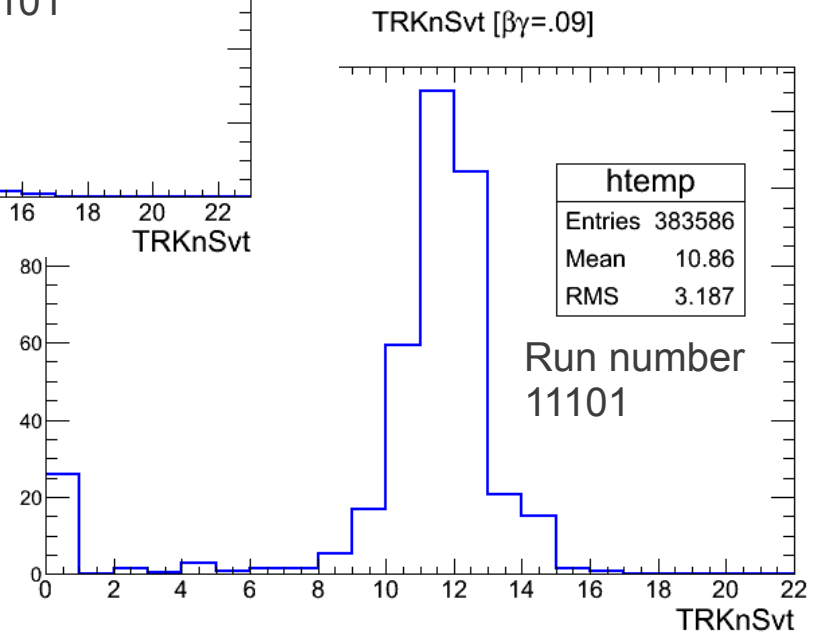

# Tracks number in the SVT

$$e^+ e^- \rightarrow \Psi'' \rightarrow D^0 \bar{D}^0 \rightarrow \pi^+ \pi^- K^+ K^-$$

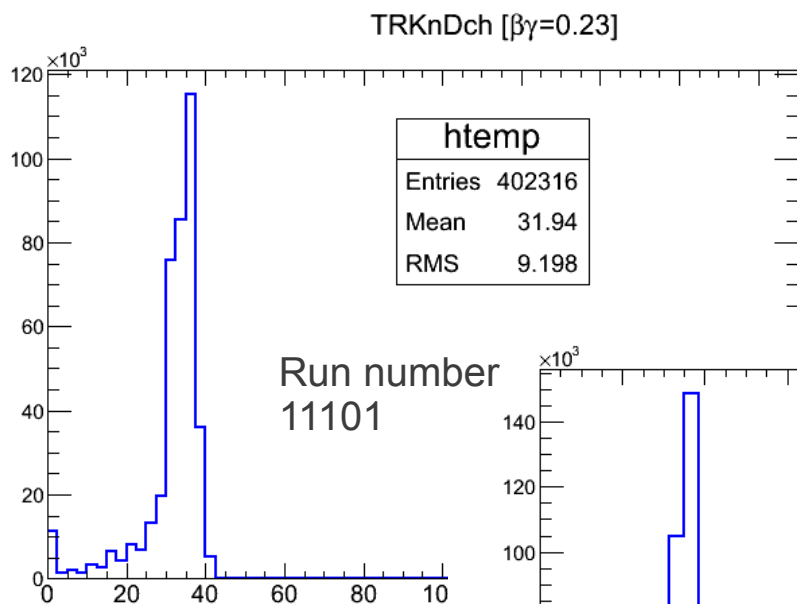

BOOST →

Same events are generated with a different  $\beta\gamma$  factor

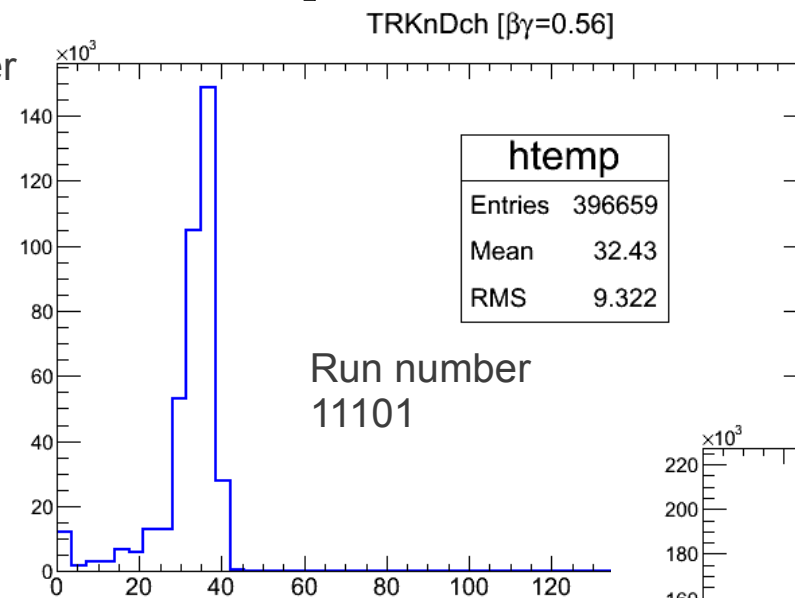

Number of entries decreases by  $\sim 1.5\%$  when the boost is increased  $\beta\gamma=0.23$  to  $\beta\gamma=0.56$ , and by  $\sim 5\%$  when it is increased from  $\beta\gamma=0.23$  to  $\beta\gamma=0.9$

# Tracks number in the Dch

Run number  
11101

Run number  
11101

$$e^+ e^- \rightarrow \Psi'' \rightarrow D^0 \bar{D}^0 \rightarrow \pi^+ \pi^- K^+ K^-$$

BOOST →

Same events are generated with a different  $\beta\gamma$  factor

Number of entries decreases by  $\sim 1.5\%$  when the boost is increased  $\beta\gamma=0.23$  to  $\beta\gamma=0.56$ , and by  $\sim 5\%$  when it is increased from  $\beta\gamma=0.23$  to  $\beta\gamma=0.9$

Run number  
11101

# Vertex resolution (z-direction only)

$$e^+ e^- \rightarrow \Psi'' \rightarrow D^0 \bar{D}^0 \rightarrow \pi^+ \pi^- K^+ K^-$$

Same events are generated with a different  $\beta\gamma$  factor

← BOOST

Vertex Resolution [z-direction] [ $\beta\gamma=0.23$ ]

Vertex Resolution [z-direction][ $\beta\gamma=0.56$ ]

Vertex Resolution [z-direction][ $\beta\gamma=0.9$ ]

Note: loose cuts are applied, but still only signal is generated!

RMS decreases when the boost is increased from  $\beta\gamma=0.23$  to  $\beta\gamma=0.56$ , however from  $\beta\gamma=0.56$  to  $\beta\gamma=0.9$  the RMS value slightly increases.

# **FastSim Vertexing Tools: an introduction**

Conclusions

- The “Vertexing Group” exists and is already actively working
- More results will be available at the next meeting in Elba
- Do not hesitate to contact me for any suggestion/requirement
- Man power required, do not hesitate to contact me and join the group

*...Many Thanks...*
