

Preliminary measurement of $BR(k\ell^2)/BR(k\mu^2)$ at KLOE

Thursday, 24 May 2007 11:30 (20 minutes)

We present a preliminary measurement of the ratio of the purely leptonic branching ratios of the charged kaons, $BR(k\ell^2)/BR(k\mu^2)$, using a sample of about 2 fb^{-1} of data acquired with the KLOE detector at the Frascati ϕ -factory DAFNE.

Presenter: SIBIDANOV, Alexei (BINP, Novosibirsk)

Session Classification: Session V

Track Classification: Lepton Universality and LFV
