

Assignment:  
TAITCJ-1

This report summarizes the overall quality of your edited manuscript. For each section, we provide specific comments on the quality and these are substantiated by examples (where available)

## Structural Review

### Overall Manuscript

- The structure of the original manuscript is perfect, and it does not need revision.

### Title & Abstract

- The title of this manuscript is appropriate as it is informative and concise.
- In addition, it has been carefully checked to ensure that it clearly conveys the aim of the study.
- The abstract of this study is appropriate and follows a logical structure.
- In the abstract, the purpose, methods and materials, results, and conclusions are appropriately stated.

### Introduction

- In the Introduction, the purpose and approach of the study are clearly indicated.
- The statement of the relevance of the findings is included in the Introduction.
- In the Introduction, the scope of the investigation is indicated.

### Materials and Methods

- In this section, appropriate description of the methodology is provided, which can be reproduced by another investigator.
- The Methods section includes appropriate presentation of the measurement procedures.
- Statements describing measurement parameters such as sensitivity and accuracy are clear and accurate.
- The calculations presented are appropriate.

Assignment:  
TAITCJ-1

This report summarizes the overall quality of your edited manuscript. For each section, we provide specific comments on the quality and these are substantiated by examples (where available)

## Results

- The results are correctly stated in only the Results section.
- No discussion is present in the Results section; this section contains only results.
- All the reported findings are relevant to the thesis.
- The text contains the appropriate summary of key results presented in figures and tables.

## Discussion

- All key results are discussed in light of whether or not they supported the hypothesis, and the discussion is convincing.
- The length of the discussion is appropriate.
- The conclusions are clear.
- There are no generalizations beyond the findings of this investigation.

## Peripheral Text Review

### Figures and/or Tables

- The figures and tables are complementary to the main text and are devoid of errors.
- They have also been cited in the main text at appropriate places.
- Note that the legends are complete and accurate.
- In this manuscript, every figure and/or table can stand alone without reference to the main text.

### Bibliography

- Most statements of fact have supporting references.
- In this manuscript, the literature cited is very pertinent to the investigation.
- Note that all references cited follow a consistent format.

Assignment:

## Content, Terminology, Style, and Format Review

### Content

- There are no gaps in content in this manuscript.
- Also, the necessary information has been added where applicable.

### Terminology

- The terms used in the manuscript are valid in the field.
- The scientific terminology and representation in the paper are appropriate and consistent.
- The scientific nomenclature (gene names, protein names) is in order throughout the text.

### Style

- The capitalization/italicization/number style is as per the conventions of the subject area.
