

Session Program

Dec 14 - 15, 2015

HIB@LNS

Session 1

INFN-Laboratori Nazionali del Sud, Catania, Italy

Mon, December 14

3:10 PM

Session 1: Reaction mechanisms with stable and exotic beams

Session | **Location:** INFN-Laboratori Nazionali del Sud, Catania, Italy, Main Conference Room | **Conveners:** Remì Bougault, Fabiana Gramegna

3:10 - 3:40 PM **The status of the NUMEN project**

Speaker

Francesco Cappuzzello

3:40 - 4:10 PM **Evolution of transfer-like reactions from Coulomb to Fermi energy**

Speaker

Alexis Daiz-Torres

4:10 - 4:40 PM **Coffee Break**

4:40 - 5:10 PM **On Instrumenting a Nuclear Physics Program**

Speaker

Emanuel Pollacco

5:10 - 5:35 PM **FAZIA: a new versatile detector device for isospin physics**

Speaker

Nicolas Le Neindre

5:35 - 6:00 PM **Recent results obtained with FAZIA detector**

Speaker

Silvia Piantelli

6:00 - 6:20 PM

Search for HyperHeavy toroidal nuclear systems formed in heavy ion collisions

Speaker

Roman Planeta

6:20 - 6:35 PM **free contributions (max 2-3 slides/speaker)**

6:35 PM
