

## 6<sup>th</sup> Roma International Conference on AstroParticle Physics

Contribution ID: 229

Type: **not specified**

### VERITAS latest results

*Wednesday, 22 June 2016 12:40 (25 minutes)*

VERITAS is an array of four imaging atmospheric Cherenkov telescopes near Tucson, Arizona and is one of the world's most sensitive detectors of very high energy (VHE:  $>100$  GeV) gamma rays and cosmic rays. The scientific reach of VERITAS covers the study of both Extragalactic and Galactic objects and the search for astrophysical Dark Matter. In this talk I will discuss the status of VERITAS operations and present a selection of recent results.

**Presenter:** Prof. HANNA, David (McGill University)

**Session Classification:** CR and Gamma
