

# **LATINAMERICAN WORKSHOP OF HIGH ENERGY PHYSICS**

**Monday, 17 July 2017 - Saturday, 22 July 2017**

**MCTP**

## **Scientific Programme**

## Scientific Program

The scientific program will include plenary and short talks on the following topics: Physics of the Standard Model, QCD, hadron physics, nuclear and heavy ions physics, Physics Beyond the SM: Models, radiative corrections, signals at colliders, LHC: Experiments and signatures, Dark matter and astroparticle physics, Gravitation, black holes, strings, Ads/CFT, amplitudes.

If you want to contribute with a talk, please indicate title and a short abstract of your presentation in the registration form. A poster sessions for advanced students will be included.
