Kondo's effect in a hierarchical s-d model and its perspectives.

Wednesday, 7 September 2016 09:30 (1 hour)

The hierarchical model for the s-d model is simpler than the
corresponding version of the Andrei kodel. But there is a precise relation between the RG flows for the two
models which will be illustrated. Some properties of the beta function for the translation invariant (non
hierarchical) Andrei's model will be also discussed.

Presenter: Prof. GALLAVOTTI, Giovanni (ROMA1)
