

Italian Companies at CERN, April 4-7 2017

Agilent Technologies Italia Spa

Agilent Vacuum, formerly Varian, the inventor of the ion pump, is the UHV technology and market leader.

www.agilent.com

ALCA Technology design, build and test systems in U.V. and U.H.V. for Physics Institutes, Universities, Astronomy and Astrophysics Laboratories and private Hi-Tech companies.

www.alcatechnology.com

Since 1952 Angelantoni is a worldwide leader with ACS brand in Environmental Test Chambers and High Vacuum Technology.

<http://www.angelantoni.it/>

BREVETTI BIZZ

PRODUCTION OF NEW COMPOSITE MATERIALS AT HIGH TEMPERATURE

- ▶ GRAPHITE – CARBON FIBRE - TUNGSTEN - MOLYBDENUM
- ▶ COPPER – ALUMINIUM – DIAMOND

www.brevettibizz.com

Performing precision mechanical machining of medium and large-sized components that require high quality standards.

<http://www.castellini.it/>

Design, manufacture and service of machines for ornamental stones extraction and industrial automation and mechanical systems for research and industry

www.fantinispa.it

Design and production of superconducting cables, coils and innovative power devices

www.icasweb.com

Design, Development, Construction and Commissioning of Automation Systems for Plants and Machines

www.ingrolfo.com

LE CUIVRE

an Italian company

Since 1958, forged parts and products in Copper Cu-OFE, copper alloys for special applications in nuclear physic research.

Components in Oxygen-free Copper OFHC for vacuum, particle accelerators and synchrotron light source machines.

<http://www.lecuivre.com/>

The wide range of Italcoil products covers all the application fields where wound components are required: industrial electronics, automation, telecommunications, automotive, security, illuminating engineering, military applications.

www.italcoil.com

Italian Companies at CERN, April 4-7 2017

Columbus develops, manufactures and distributes magnesium diboride MgB₂ superconducting wires in long lengths, with various architectures and characteristics to fit the end users' requests at best

www.columbussuperconductors.com

COSTRUZIONI ELETTROTECNICHE CEAR s.r.l.

Design and Manufacturing of MV/LV Switchgears, MV/LV Substations, Industrial Automation Systems, Hazardous Area Applications

www.cearsistemi.it

Mechanical design and manufacture of components and integrated systems for particle accelerators and synchrotron light source machines

www.cinel.com

Design and manufacturing of cryogenic and high vacuum equipment.

www.criotec.com

SCIENCE SOLUTIONS
DB ELETTRONICA-SCIENCE DIVISION: RF Amplifier and Systems Solutions

www.db-science.com

METALMINOTTI

UNCONVENTIONAL COPPER ALLOYS SINCE 1924

Metalminotti, Unconventional Copper Alloys Since 1924

<http://www.metalminotti.it/>

N:ER

INGEGNERIA

RAMI/RAMS analysis, Risk Assessment, Requirement Management, Verification, Validation and Testing of electronic, electrical, electromechanical and mechanical equipment.

<http://www.niering.it/en/>

Radioactive Waste management, Radiation Protection, Radioactive Characterisation, Site Decommissioning and Remediation.

www.nucleco.it

Since 1950, your international partner building with passion in the heavy metal structures sector

www.omba.biz

PERSICO is specialized in designing / manufacturing / installing worldwide superior-quality tools and automatic productions lines devoted to the production of parts made with composites plastics and carbon-reinforced techno-polymers for automotive, aerospace, train, naval, defense industrial sectors.

www.persico.com

Italian Companies at CERN, April 4-7 2017

De Pretto Industrie

Engineering, fabrication and testing of tailor made equipment and mechanical components for nuclear research, plasma physics research and particle accelerators.

www.deprettoindustrie.it

Innovative and efficient solutions for the assembly of your electronic boards.

www.primeelettronica.com

It is a **General Contractor**, with over 30 years of experience in Italy and in foreign countries, specialized into the **"turn-key"** construction and buildings renovation for commercial and industrial sectors.

www.gruppodimensione.com

Manufacturing of cryostats vacuum chambers and mechanical components for scientific and nuclear research. Strong site erection division.

EEI Spa designs and manufactures high precision, high stability and high dynamic lower voltage Power Supplies for e-magnets of particle accelerators

<http://www.eei.it/>

Engineering, supply, prefabrication and installation of modular equipment solutions, pipe networks and relevant accessories, carpentry, in off-shore and on-shore fields.

www.ram-power.it

Energy Technology Srl

OCHEM solutions are based on wide experience and tangible expertise in high quality power electronics systems.

www.ocem.eu

Making our planet more productive

Rivoira, part of the multinational group PRAXAIR, is one of the main supplier of Specialty Gas, services, materials, equipments and systems for different users of gas, from big business to small laboratory.

www.rivoiragroup.it

DESIGN, CONSTRUCTION, MAINTENANCE OF FIRE FIGHTING SYSTEM AND FIRE DETECTION, SMOKE FILTERS, ANTI-INTRUSION. FROM 25 YEARS LEADERS FIELD FIRE

www.esseci-antincendio.it

SAES Group is the leading supplier of UHV and XHV solutions based on the Non-Evaporable Getter (NEG) technology for a variety of industrial and research applications.

www.saesgroup.com

Italian Companies at CERN, April 4-7 2017

EUROCONTROL

Single source provider of electromechanics, electronics, optronics, and mechatronics solution

www.eurocontrol-spa.com

SEA-ALP Engineering is a consortium with a consolidated experience in design and manufacture of custom machinery for Research Projects for Nuclear Physics

www.sea-alp.com

vaqtec

vacuum technology & components

Manufacturer and distributor of High Vacuum and Ultra High Vacuum components and chambers

www.vaqtec.com

TECNIKABEL

Leader manufacturer of special electrical and optical cables, in compliance with all International Standards and Safety Norms; CERN's supplier since 1990 for low voltage, control, data transmission and customized cables.

www.tecnikabel.it

ASG Superconductors designs and builds conventional and superconducting magnets for high-energy physics research, nuclear fusion, optimization of electricity grids and medical applications.

www.as-g.it

Front-End & Data-Acquisition Electronics, HV/LV Power Supply Systems and Powered Crates.

<http://www.caen.it>

Founded in Mantua, Italy in 1947, Belleli Energy CPE defines solutions for critical process equipment for the hydrocarbon and power industries.

www.belleli.it

Walter Tosto SpA is an Italian leading manufacturer of critical, long lead equipment for the Oil & Gas, Petrochemical, Power and Energy, Food and Pharma markets.

www.waltertosto.it

Fondazione Bruno Kessler is an european leading Research & Innovation center focused on ICT, Materials & Microsystems, Humanities and social sciences.

www.fbk.eu

CECOM was **founded in 1964** in Rome by Cesare Ceracchi. Its growth was due to the prestigious collaborations with several organizations and companies, e.g. CERN, INFN, ENEA, several universities in Italy, and FINMECCANICA group, now become LEONARDO group. Excellence, precision, quality, flexibility and frontier technology have made CECOM a leader in high precision mechanics and UHV applications.

<https://www.cecomweb.com/>
