

SciNeGHE 2016 High-energy gamma-ray experiments at the dawn of gravitational wave astronomy

Contribution ID: 91

Type: **Talk**

The future of gamma-ray astronomy with LHAASO

Friday, 21 October 2016 17:00 (25 minutes)

I'll firstly review the history of high altitude cosmic rays research in China and our pursuit for a high sensitivity gamma rays telescope in very high energy region. Then I'll talk about the status and prospect of LHAASO.
