

SuperB plenary meetings in 2009

16th-20th June	Perugia
5th-9th October	SLAC
1st - 5th December	Frascati

Physics activities organisation proposal

Physics sessions are foreseen @ each SuperB plenary meetings

concentrating on sensitivity studies

Physics Workshops will be organised twice per year tentatively before SuperB plenary meetings

All groups will meet, as here in Warwick.

Next Physics meeting will be probably in Frascati
(check with local people)

MAIN TASK OF THE PHYSICS ACTIVITIES

will be the Physics section of SuperB TDR,

Mid-time deliverable :

A document @ end-2009 containing the motivation for SuperB

Short document (~15-20)pages

This document has to be ready in fall, circulated and discussed
at the next SuperB Workshop in Frascati

Work should continue between the workshops
stimulated by the conveners

Feel free to propose new activities to us and to the conveners

Centralised Tools (general (and WG) mailing list, wiki page central with
subgroup pages etc..)
will be available in a very near future

to keep track of the ongoing activities and to keep people in contact

Thanks

Paul Harrison
Tim Gershon
Thomas Latham

and all the organisation team
