

Geant4 21st Collaboration Meeting

Contribution ID: 116

Type: **not specified**

Modularisation of Geant4 Libraries

Thursday, 15 September 2016 15:00 (30 minutes)

Discussion on Geant4 CMake/Library build structure

- New CMake functionality to simplify library/module declaration and dependencies.
- Timeline for migration to new CMake system
- Aspects related to Git migration and repository structure
- Simplification of preprocessor usage for robust builds of both Geant4 and client applications

Primary author: Dr MORGAN, Ben (University of Warwick)

Session Classification: Parallel 6B - Geant4 Development Tools and Modularization
