

"Academic-Industry partnership: Can the IMI PPP model be extended/exported to medical imaging industry?"

Bernd Stowasser, Sanofi, on behalf of the European Federation of Pharmaceutical Industries and Associations (EFPIA)

Abstract:

The Innovative Medicine Initiative (IMI) is - with an overall budget of 5.2 bill. € - the largest Public Private Partnership (PPP) in the global healthcare sector. Key aspects of this PPP will be presented and an overview of Imaging activities within IMI projects across a number of different disease areas will be given. Further details on selected projects in the area of Diabetes / Metabolic Disorders as well as Oncology will be provided. A brief outlook on how to engage in and extend these activities will conclude this presentation.
