

SM&FT 2017 - The XVII Workshop on Statistical Mechanics and nonperturbative Field Theory

Wednesday, 13 December 2017

Session 1 (09:20 - 11:00)

-Conveners: Giovanni Cicuti

time	[id] title	presenter
09:20	[91] Pathway-based analysis of gene expression data: method and applications.	Prof. DOMANY, Eytan
10:00	[80] Abeta peptides and beta-sheet breakers. A coarse grained molecular dynamics approach	DE SANTIS, Emiliano
10:20	[64] Multi-scale molecular dynamics & first-principle calculations of X-ray absorption spectra: an application to the study of metal cation coordination in water	STELLATO, Francesco
10:40	[52] Large Deviations in Renewal Models of Statistical Mechanics	Dr ZAMPARO, Marco
