

SM&FT 2017 - The XVII Workshop on Statistical Mechanics and nonperturbative Field Theory

mercoledì 13 dicembre 2017

Session 3 (14:30 - 16:30)

-Coordinatori: Giuseppe Gonnella

time	[id] title	presenter
14:30	[54] Designing effective anticancer-radiopeptide carriers A Molecular Dynamics study of their interaction with model tumor and healthy cell membranes	MINICOZZI, Velia
14:50	[37] Yield Transition and Controlled Fluidization of Soft-Glassy Materials	LULLI, Matteo
15:10	[38] Entanglement measures in Extended Quantum Systems: The Negativity Spectrum	RUGGIERO, Paola
15:30	[41] Chaotic dynamical phase induced by non-equilibrium quantum fluctuations	LEROSE, Alessio
15:50	[53] Corner contributions to holographic entanglement entropy in AdS ₄ /BCFT ₃	SISTI, Jacopo
16:10	[68] Thermal fluctuations of an interface near a contact line	BELARDINELLI, Daniele
