## QED and QCD with massless fermions in three dimensions

*Tuesday, 27 June 2017 17:40 (25 minutes)*

Recent numerical results on QED and QCD with massless fermions in three dimensions will be presented. The main focus will be classifying theories as conformal or non-conformal. Results for the absence or presence of bilinear condensates will be presented using the behavior of low lying eigenvalues. Correlation functions of fermion bilinears will also be presented.
