Status of High Intensity Beam Facility at LNL

Thursday, 21 September 2017 09:45 (25 minutes)

The High Intensity Beam Facility cyclotron based is under commissioning at LNL. The facility is developing in the SPES project framework and the proton driver will provide a beam up to 50 kW power and 70 MeV energy for research in nuclear physics, medical and neutron source applications as well.

Primary authors: CALORE, Andrea (LNL); LOMBARDI, Augusto (LNL); CAMPO, Daniela (LNL); PRANOVI, Lorenzo (LNL); MAGGIORE, Mario (LNL); ANTONINI, Piergiorgio (LNL)

Presenter: MAGGIORE, Mario (LNL)

Session Classification: Session 1
