

# Today's Material

[/home/FOOT-T3/battistfoott3/SoftDemo](#)

# Local settings on Tier3

1) to make use of root-related macro/software:

```
source /opt/exp_software/foot/root4foot.sh
```

2) to make use of FLUKA related software, including graphical interface (Flair) for visualization

```
source /opt/exp_software/foot/FLUKA/flukafoot_t3bo_setup.sh
```

**Warning: the two setups might create incompatible paths in the runtime environment**

Also: in order to use Flair correctly for geometry visualization:

```
/usr/local/bin/flair
```

alternatively, after invoking 2) (it has to be corrected) :

```
unalias flair
```

```
flair
```
