Type: **Plenary Sessions** (for INVITED PLENARY TALKS only!)

More than 50 years of Polarized Targets - A Personal Memoir

Monday, 10 September 2018 11:30 (40 minutes)

I will discuss the role of polarized solid targets in particle physics from their inception in 1962 to the present day. I will present the developments, such as cryogenic improvements and better materials, that have contributed to our better understanding of the physical processes involved in particle scattering. Examples of current efforts will be given.

Primary author: Prof. CRABB, Donald G. (University of Virginia)

Presenter: Prof. CRABB, Donald G. (University of Virginia)

Session Classification: Plenary

Track Classification: Polarized Ion and Lepton Sources and Targets
