Warp-X: a new exascale computing platform for Beam-Plasma Simulations

Wednesday, 27 September 2017 18:00 (25 minutes)

Turning the current experimental plasma accelerator state-of-the-art from a promising technology into main-stream scientific tools depends critically on high-performance, high-fidelity modeling of complex processes that develop over a wide range of space and time scales. As part of the U.S. Department of Energy's Exascale Computing Project, a team from Lawrence Berkeley National Laboratory, in collaboration with teams from SLAC National Accelerator Laboratory and Lawrence Livermore National Laboratory, is developing a new powerful plasma accelerator simulation tool. The new software will harness the power of future exascale supercomputers for the exploration of outstanding questions in the physics of acceleration and transport of particle beams in chains of plasma channels. This will benefit the ultimate goal of compact and affordable high-energy physics colliders, and many spinoff applications of plasma accelerators along the way. We will present the various components of the codes such as the new Particle-In-Cell Scalable Application Resource (PICSAR) and the redesigned adaptive mesh refinement library AMReX, which are combined with redesigned elements of the Warp codes, in the new WarpX software. The status, examples of applications and future developments will be discussed.

Primary author: VAY, Jean-Luc (Berkeley Lab)

Co-authors: Dr MYERS, Andrew (Lawrence Berkeley National Laboratory); Dr ALMGREN, Ann (Lawrence Berkeley National Laboratory); Dr NG, Cho (SLAC National Accelerator Laboratory); Dr GROTE, David (Lawrence Livermore National Laboratory); Mr BLACLARD, Guillaume (Lawrence Berkeley National Laboratory); Dr VINCENTI, Henri (CEA Saclay); Dr PARK, Jaehong (Lawrence Berkeley National Laboratory); Dr BELL, John (Lawrence Berkeley National Laboratory); Dr GE, Lixin (SLAC National Accelerator Laboratory); HOGAN, Mark (SLAC National Accelerator Laboratory); Dr LOBET, Mathieu (Maison de la simulation CEA Saclay); Dr THEVENET, Maxence (Lawrence Berkeley National Laboratory); Dr KONONENKO, Oleksiy (SLAC National Accelerator Laboratory); Dr SHAPOVAL, Olga (Lawrence Berkeley National Laboratory); Dr LEHE, Remi (Lawrence Berkeley National Laboratory); Dr RYNE, Robert (Lawrence Berkeley National Laboratory); Dr BECKNER, Vincent (Lawrence Berkeley National Laboratory); Dr ZHANG, Weiqun (Lawrence Berkeley National Laboratory)

Presenter: VAY, Jean-Luc (Berkeley Lab)

Session Classification: WG6_Parallel

Track Classification: WG6 - Theory and Simulations
