

Challenges in experimental jet physics in heavy ion collisions

Thursday, 18 May 2017 11:30 (1h 30m)

In this talk I will review recent experimental progress in jet physics in heavy ion collisions, from first generation of measurements like jet cross sections to the current focus of the field, which is jet substructure. Experimental techniques, observables and challenges in the interface with the theory will be discussed.

Presenter: CUNQUEIRO MENDEZ, Leticia
