

1st International Conference on Frontiers in Diagnostic Technologies

Tuesday, 24 November 2009

Satellite meeting on Polarimetry measurements in various fields - Auditorium B. Touschek (15:00 - 21:00)

time	[id] title	presenter
15:00	[132] X ray Polarimetry:a new window on the high energy sky	BELLAZZINI, Ronaldo
15:30	[130] Polarimetry for Cosmological studies	Prof. DE BERNARDIS, Paolo
16:00	Coffee break	
16:30	[140] Precision polarimetric techniques to measure gas and vacuum magnetic birefringence	Prof. CANTATORE, Giovanni
17:00	[145] Models for JET Polarimeter Data, Faraday Effect and constraints on Equilibrium reconstruction	Dr ORSITTO, Francesco Paolo
17:30	[142] Fourier-Transform Infrared Spectroscopic Ellipsometry for Material Identification	Dr ORTOLANI, Michele
18:00	[154] Discussion	Dr MAZON, Didier
