A journey through Wilson loops in 3D Chern-Simons-matter theories

Tuesday, 12 September 2017 14:30 (45 minutes)

I will review some recent results concerning BPS Wilson loops in 3D $N=6$ ABJ(M) and $N=4$ Chern-Simons-matter theories, with particular focus on their role in testing AdS/CFT correspondence and integrability underlying it.

Presenter: PENATI, Silvia (MIB)
