

9th international workshop: Quantum Phase Transitions in Nuclei and Many-body Systems

Tuesday, 22 May 2018 - Friday, 25 May 2018

Padova

Book of Abstracts

Contents

01-01_Both sides of the story: Shape coexistence and Quantum Phase Transitions	1
01-03_Prolate-oblate shape coexistence in Se isotopes from isomer spectroscopy	1
01-04_Shape coexistence and collective low-spin states in $^{112,114}\text{Sn}$ studied with the (p,p' γ) DSA coincidence technique and SONIC@HORUS	1
01-05_Shape-coexistence vs QPT in the rare-earth region	1
01-06_Nuclear shape phase transitions described in terms of the sextic oscillator	1
01-07_Bohr model description of the critical point for the first order shape phase transition	1
01-08_Coexistent Shapes in the Bohr Hamiltonian: Limitations and phenomenological Chal- lenges	1
01-09_Quantum Phase Transitions within the Shell Model	2
01-10_Signature of γ -softness in nuclei at the Se-Ge region	2
02-01_More (Shapes) is Different (Symmetries)	2
02-02_Structure of Cd isotopes within the beyond-mean-field IBM	2
02-03_Partial dynamical symmetry and the phonon puzzle in Cd isotopes	2
02-04_The phase diagram of the extended Agassi model	2
02-05_New Predictions of the Proxy-SU(3) Approximate Symmetry	2
02-06_Nuclear tetrahedral and octahedral symmetries: New research lines after the first identified case	2
02-07_Higher-rank discrete symmetries in the IBM	3
02-08_Phases of clusterized nuclei	3
02-09_QPT in cluster nuclei	3
02-10_Quartet structure of N=Z nuclei in an IBM formalism: ^{28}Si as a nucleus at the U(5)- $\bar{\text{SU}}(3)$ phase-transitional point	3
02-11_Nuclear shape effects at the border of atomic energy scale	3

03-01_Seeing Physics, Comparing Theory and Experiment: Emergent Collectivity, Perspective/Correlations, Precision data, Theoretical accuracy, Parameters	3
03-02_Quest for common semantics a few remarks to ‘beta-vibration’, ‘shape coexistence’ and ‘phase transition’	3
03-03_The low-Z boundary of the N=90 phase transition ^{148}Ce near X(5)	4
03-04_First observation of collective rotation of an oblate nucleus at very high spin	4
03-05_Nuclear level density as a signature of shape phase transitions	4
03-06_Shell model, level density and phase transitions	4
03-07_Correlations between nuclear charge radii, E0 transitions and summed M1 strengths	4
03-08_Decay characteristics of the scissors mode in the QPT and $0\nu\beta\beta$ -partner isotopes ^{150}Nd and ^{150}Sm	4
03-09_E2 strength of the Scissors Mode and evolution of F-vector quadrupole charges over a shape phase transition	4
03-10_Excitation energy dependence of the moment of inertia of well-deformed nuclei	5
04-01_Underlying mechanism of shape evolution and the Quantum Phase Transition and its manifestations	5
04-02_Appearance of shape isomerism in the Ni isotopic chain	5
04-03_Shape coexistence in ^{96}Zr	5
04-04_B(E2) measurement in ^{98}Zr and its relation to the QPT in Zr nuclei due to Shell Evolution	5
04-05_Lifetime measurements in ^{98}Zr and shape phase transition in Zr isotopes	5
04-06_Two-particle transfer reactions: a key tool for the study of phase transitions in nuclei	6
04-07_Interplay between spherical shapes and a deformed shape in Zirconium isotopes	6
04-08_Studying shape staggering in Hg isotopes using Laser spectroscopy	6
05-01_Alternative approaches to phase transitions	6
05-02_Tilted-axis wobbling in odd-mass nuclei	6
05-03_Quantum phase transitions in odd-A nuclei: The effect of the odd particle along the critical line	6
06-01_An Overview of QPT and ESQPT in Molecular Systems	6
06-02_Saddle point localization of molecular wavefunctions	6
06-03_Topological superfluid phase with repulsive fermionic atoms	7

06-04_Relationship between the ESPQT and the thermal phase transition in the Dicke model	7
06-05_Excited-state quantum phase transition and quantum speed limit	7
06-06_Breaking and restoration of rotational symmetry in the low-energy spectrum of light alpha-conjugate nuclei on the lattice	7
07-01_Introduction	7
07-02_Signature of alpha-like quartet phase transition in N=Z nuclei	7
07-03_Nuclear clustering with and beyond the relativistic mean-field framework	8
07-04_Symmetry Conserving Configuration Mixing description of odd-mass nuclei and a short discussion on pairing transitions	8
07-05_Octupole correlations in neutron-rich odd-mass nuclei	8
07-06_Quantum shape-phase transitions in odd-mass nuclei	8
07-07_Shape evolutions in Gd isotopes studied with five-dimensional collective Hamiltonian based on covariant DFT	8
07-08_Shell-model study in A~130 nuclei and chiral doublet of 128Cs	8
07-09_Nuclear multiple chirality in Rh-106: a manifestation of triaxial shape coexistence	8
08-01_Excited state quantum phase transitions: Introduction	9
08-02a_Excited state quantum phase transition in the Lipkin-Meshkov-Glick model and its influence on the non-adiabatic dynamics	9
08-02b_Smearing out of the excited state quantum phase transition properties in the dissipative LMG model and their restore by delayed feedback control	9
08-04_Nonequilibrium quantum dynamics: from full random matrices to real systems	9
08-05_Excited state quantum phase transitions and quantum quench dynamics in an extended Dicke model	9
08-06_Excited state quantum phase transitions studied from a non-Hermitian perspective	9
08-07_Exceptional points for randomly perturbed critical Hamiltonians	9
08-08_Analytical description of the excited state phase transition to octupole deformed shape in alternating parity bands	10
08-09_Landau-Zener transitions in the Pechukas-Yukawa formalism under the influence of Brownian noise	10
01-02_Experimental evidences of shape coexistence in the Z=82 and A~100, N~60 regions	10

Board: 01 / 1

01-01_Both sides of the story: Shape coexistence and Quantum Phase Transitions

2

01-03_Prolate-oblate shape coexistence in Se isotopes from isomer spectroscopy

3

01-04_Shape coexistence and collective low-spin states in $^{112,114}\text{Sn}$ studied with the (p,p' γ) DSA coincidence technique and SONIC@HORUS

4

01-05_Shape-coexistence vs QPT in the rare-earth region

5

01-06_Nuclear shape phase transitions described in terms of the sextic oscillator

6

01-07_Bohr model description of the critical point for the first order shape phase transition

7

01-08_Coexistent Shapes in the Bohr Hamiltonian: Limitations and phenomenological Challenges

8

01-09_Quantum Phase Transitions within the Shell Model

9

01-10_Signature of γ -softness in nuclei at the Se-Ge region

10

02-01_More (Shapes) is Different (Symmetries)

11

02-02_Structure of Cd isotopes within the beyond-mean-field IBM

12

02-03_Partial dynamical symmetry and the phonon puzzle in Cd isotopes

13

02-04_The phase diagram of the extended Agassi model

14

02-05_New Predictions of the Proxy-SU(3) Approximate Symmetry

15

02-06_Nuclear tetrahedral and octahedral symmetries: New research lines after the first identified case

16

02-07_Higher-rank discrete symmetries in the IBM

17

02-08_Phases of clusterized nuclei

18

02-09_QPT in cluster nuclei

19

02-10_Quartet structure of $N=Z$ nuclei in an IBM formalism: ^{28}Si as a nucleus at the $U(5)-\overline{SU(3)}$ phase-transitional point

20

02-11_Nuclear shape effects at the border of atomic energy scale

22

03-01_Seeing Physics, Comparing Theory and Experiment: Emergent Collectivity, Perspective/Correlations, Precision data, Theoretical accuracy, Parameters

23

03-02_ Quest for common semantics a few remarks to 'beta-vibration', 'shape coexistence', and 'phase transition'

24

03-03_ The low-Z boundary of the N=90 phase transition ^{148}Ce near $X(5)$

25

03-04_ First observation of collective rotation of an oblate nucleus at very high spin

26

03-05_ Nuclear level density as a signature of shape phase transitions

27

03-06_ Shell model, level density and phase transitions

28

03-07_ Correlations between nuclear charge radii, E0 transitions and summed M1 strengths

29

03-08_ Decay characteristics of the scissors mode in the QPT and $0\nu\beta\beta$ -partner isotopes ^{150}Nd and ^{150}Sm

30

03-09_E2 strength of the Scissors Mode and evolution of F-vector quadrupole charges over a shape phase transition

31

03-10_Excitation energy dependence of the moment of inertia of well-deformed nuclei

32

04-01_Underlying mechanism of shape evolution and the Quantum Phase Transition and its manifestations

33

04-02_Appearance of shape isomerism in the Ni isotopic chain

34

04-03_Shape coexistence in ^{96}Zr

35

04-04_B(E2) measurement in ^{98}Zr and its relation to the QPT in Zr nuclei due to Shell Evolution

36

04-05_Lifetime measurements in ^{98}Zr and shape phase transition in Zr isotopes

37

04-06_Two-particle transfer reactions: a key tool for the study of phase transitions in nuclei

38

04-07_Interplay between spherical shapes and a deformed shape in Zirconium isotopes

39

04-08_Studying shape staggering in Hg isotopes using Laser spectroscopy

40

05-01_Alternative approaches to phase transitions

41

05-02_Tilted-axis wobbling in odd-mass nuclei

42

05-03_Quantum phase transitions in odd-A nuclei: The effect of the odd particle along the critical line

43

06-01_An Overview of QPT and ESQPT in Molecular Systems

44

06-02_Saddle point localization of molecular wavefunctions

45

06-03_Topological superfluid phase with repulsive fermionic atoms

46

06-04_Relationship between the ESPQT and the thermal phase transition in the Dicke model

47

06-05_Excited-state quantum phase transition and quantum speed limit

48

06-06_Breaking and restoration of rotational symmetry in the low-energy spectrum of light alpha-conjugate nuclei on the lattice

49

07-01_Introduction

50

07-02_Signature of alpha-like quartet phase transition in N=Z nuclei

51

07-03_Nuclear clustering with and beyond the relativistic mean-field framework

52

07-04_Symmetry Conserving Configuration Mixing description of odd-mass nuclei and a short discussion on pairing transitions

53

07-05_Octupole correlations in neutron-rich odd-mass nuclei

54

07-06_Quantum shape-phase transitions in odd-mass nuclei

55

07-07_Shape evolutions in Gd isotopes studied with five-dimensional collective Hamiltonian based on covariant DFT

56

07-08_Shell-model study in $A \sim 130$ nuclei and chiral doublet of ^{128}Cs

57

07-09_Nuclear multiple chirality in Rh-106: a manifestation of triaxial shape coexistence

58

08-01_Excited state quantum phase transitions: Introduction

59

08-02a_Excited state quantum phase transition in the Lipkin-Meshkov-Glick model and its influence on the non-adiabatic dynamics

60

08-02b_Smearing out of the excited state quantum phase transition properties in the dissipative LMG model and their restore by delayed feedback control

61

08-04_Nonequilibrium quantum dynamics: from full random matrices to real systems

62

08-05_Excited state quantum phase transitions and quantum quench dynamics in an extended Dicke model

63

08-06_Excited state quantum phase transitions studied from a non-Hermitian perspective

64

08-07_Exceptional points for randomly perturbed critical Hamiltonians

65

08-08_Analytical description of the excited state phase transition to octupole deformed shape in alternating parity bands

66

08-09_Landau-Zener transitions in the Pechukas-Yukawa formalism under the influence of Brownian noise

67

01-02_Experimental evidences of shape coexistence in the $Z=82$ and $A\sim 100$, $N\sim 60$ regions
