

WHY A PHD IN ALICE?

- ALICE is the only LHC experiment devoted to the study of the Quark-Gluon Plasma (QGP), the state of our Universe for the first few millionths of a second after the Big Bang.

- Highly international environment : you will join a collaboration of 1800 members from 174 institutes in 42 countries spread over the world
- Possibility to visit and spend time in the Largest European Laboratory of Particle Physics

- Possibility to work on projects which are beyond the state of the art and that can be used in several fields beyond HEP:
 - ITS Upgrade : very fast CMOS sensors
 - Computing: virtual analysis facilities based on Cloud Computing
 - Practical computing skills
