Measurements of CPV in b and c decays at LHCb

Precision measurements of CP violating observables in the decays of b and c hadrons are powerful probes to search for physics beyond the Standard Model. The most recent results on CP violation in the decay, mixing and interference of both b and c hadrons obtained by the LHCb Collaboration with Run I and years 2015-2016 of Run II are reviewed. In particular world best constraints and world first measurements are provided for CKM elements, unitarity angles and charm parameters.

Collaboration name

LHCb

Primary author: LHCb COLLABORATION

Presenter: LHCb COLLABORATION

Session Classification: Flavor and Precision Physics

Track Classification: Flavor and Precision Physics
