

RD09 - 9th International Conference on Large Scale Applications and Radiation Hardness of Semiconductor Detectors

Wednesday, September 30, 2009 - Friday, October 2, 2009

Sala Convegni della Cassa di Risparmio di Firenze

Scientific Program

Topics of the conference

The conference will focus on semiconductor detectors issues relevant to applications in accelerator and space research. Topics include:

- large semiconductor systems for calorimetry and tracking applications;
- radiation damage measurements and modeling;
- radiation hardness of semiconductor detectors;
- innovative detectors and electronic systems.
