Superstrings, lattice and AdS/CFT

Thursday, 24 May 2018 14:20 (45 minutes)

I will discuss perturbative and non-perturbative approaches to the quantization of the superstring sigma-models relevant in AdS/CFT, reporting in particular on the use of lattice field theory methods in this context.

Presenter: FORINI, Valentina (City University London and Humboldt University Berlin)

Session Classification: Afternoon Session
