

Pier Francesco Bortignon (5/8/1948 – 27/8/2018)

- Scientific career and achievements; nuclear field theory, collective motion
- Strong relationships with experimental groups. Inspiring role for the physics programs
- Administrative roles in University: deputy director of the Department, Chair of the Board of Studies (in Milano and at national level), member of many interdepartmental panels
- Human qualities! An example for us all for his generosity
