

# Bound states in strongly coupled systems

## Wednesday, 14 March 2018

### **BSM and QCD (09:30 - 13:00)**

time	[id] title	presenter
09:30	[15] Bound states and Interquark Potential in High Temperature Lattice Gauge Theories	CASELLE, Michele
10:00	[13] Present and future hadron spectroscopy at JLab	BATTAGLIERI, Marco
10:30	[38] Large scale separation from mass-split BSM models	Prof. HASENFRATZ, Anna
11:00	Coffee Break	
11:30	[33] Numerical exploration of a mass-split model with four light and eight heavy flavors	WITZEL, Oliver
12:00	[41] QCD screening masses in external fields	D'ELIA, Massimo
12:30	[32] S-matrix bootstrap revisited	PENEDONES, Joao

### **BSM and QCD (14:30 - 16:30)**

time	[id] title	presenter
14:30	[17] Nonperturbative applications of the functional renormalization group	Dr ZAMBELLI, Luca
15:00	[43] Flavor hierarchies from dynamical scales	PANICO, Giuliano
15:30	[40] Dark Matter from new strong dynamics	CONTINO, Roberto
16:00	Coffee Break
