Galactic chemical evolution - "E. Fermi" conference room (17:30 - 19:00)

-Conveners: Maria Lugaro

time	[id] title	presenter
17:30	[182] Dynamical and chemical evolution of the Milky Way from Optical and IR spectroscopic Surveys	RANDICH, Sofia
18:00	[237] Galactic chemical evolution and the role of rotating massive star yields	PRANTZOS, Nikos
18:30	[95] Heavy element production:merging neutron stars versus supernovae	MATTEUCCI, Maria Francesca
18:45	[84] Inhomogeneous Galactic Chemical Evolution of r-process Elements	WEHMEYER, Benjamin
