Current status of Russian 4th generation Specialized Synchrotron Radiation Source SSRS-4

Friday, 28 September 2018 09:30 (30 minutes)

In this report we present new information about one of the largest Russian scientific projects, a new and advanced 6 GeV 4-th generation radiation facility based on both synchrotron and FEL radiation. The report summarizes the results of preliminary research of SSRS4 general layout and accelerator complex parameters.
