Knee, ankle and GZK cutoff in historical perspective

Tuesday, 19 June 2018 09:30 (45 minutes)

In the field of cosmic ray physics the energy spectrum of the high-energy primary particles is the basic information. The discovery and further investigation of the main features of the spectrum - first and second knee, ankle and GZK cutoff are described following the historical development.

Primary author: Prof. MATTHIAE, Giorgio (Università di Tor Vergata)

Presenter: Prof. MATTHIAE, Giorgio (Università di Tor Vergata)

Session Classification: Indirect Measurements of High Energy Cosmic Rays
