10 years of the Fermi Gamma-ray Space Telescope

Monday, 18 June 2018 12:05 (35 minutes)

The Fermi Gamma-ray Space Telescope was launched 10 years ago and since then it has dramatically changed our knowledge of the gamma-ray sky.

The status of the observatory, and in particular of the Large Area Telescope, and the main results of these first ten years of data taking will be presented, with particular attention to the multi-messenger context.
