Status of AdVirgo before the new Observation Run

Wednesday, 20 June 2018 11:35 (30 minutes)

After the exciting results obtained by Advanced Virgo in the last joint run with LIGO, the observation of first GW source together with gamma and X satellites and astronomical observatories and the scientific outcomes of this revolutionary observation, we report on the status of Advanced Virgo before the next, new observation run and on the perspectives of the upgrades for the future
