

Adsorption of oxygen species on the SnO₂ (110) defective surface: a DFT investigation

Wednesday, 11 September 2019 09:20 (20 minutes)

Adsorption of oxygen species on the SnO₂ (110) defective surface: a DFT investigation

Summary

Topic

1. Physical and Chemical Sensors

Primary author: KRIK, Soufiane (Department of Physics and Earth Sciences, University of Ferrara)

Presenter: KRIK, Soufiane (Department of Physics and Earth Sciences, University of Ferrara)

Session Classification: Morning Session 1
