## ABOUT US

Campoverde provides business services in the **Environment, Safety,, Health and Research** fields for the enterprise risk management. Campoverde provides also technical and management training.

The core business of the company is **radioactive materials management**. Campoverde delivers services that cover the entire product life, from product supply to waste disposal.

Campoverde product portfolio for nuclear medicine, research and industry also includes: **radioactive sources, reagents, drugs, and instruments (control and measurement)**.

Campoverde offers its competences in the following fields:

- RADIOACTIVE MATTER**
- ENVIRONMENT & SAFETY**
- MANAGEMENT TRAINING**
- SCIENTIFIC RESEARCH**
- NUCLEAR MEDICINE**

## RADIOACTIVE MATTER

Campoverde core business is radioactive material management. Company activities include the offer of radioactive sources, collection, transport and disposal of radioactive waste, radiological monitoring and characterization.

in compliance with the current regulations, all the operations are duly certified in order to relieve the

customer of any civil and criminal liability about waste delivered. Campoverde provides **collection, packaging, transport and analysis** of:

- radioactive waste coming from **medical use, scientific research and industrial practice**
- exhausted unusable radioactive sources (also high activity sources and orphan sources)
- lightning rods with radioactive elements
- smoke detectors containing radioactive elements
- animal carcasses contaminated by radioactive materials
- metallic scraps either contaminated or containing radioactive sources
- building debris, materials destined to construction and soil, either contaminated by artificial radionuclide or by **NORM – TENORM**.

The main goal is providing final and customized solutions to radiological issues in the medical, industrial and scientific research fields.

Campoverde **Laboratory** is accredited to **ISO/IEC 17025:2005** standard and offers environmental and radiological monitoring and radiological characterization.

Radioprotection services include the appointment of **Radioprotection Expert** and the appointment of the **Authorized Doctor**.

The company is a reference for research centres, universities and hospitals, and it stands out for the offer of specialized products such as:

- Radioactive industrial sources
- Calibration sources
- Radiation measurement instruments

## ENVIRONMENT & SAFETY

Campoverde services, addressed to public and private organizations all over Italy, include:

- customized programs to support companies in the optimization and management of processes regarding **safety, health (Lgs.D.81/2008)** and **environment protection (Lgs.D. 152/2006)**
- customized training defined according to a careful analysis of financing opportunities
- support regarding sensitive **privacy and corporate administrative responsibility (Lgs.D. 231/2001)**

Campoverde consultancy service also includes the development of customized programs regarding the implementation and maintenance of the following Management Systems :

- **Quality** (ISO 9001)
- **Safety** (OHSAS 18001 – Guidelines UNI-INAIL)
- **Environment** (ISO 14001 – Regulations EMAS)
- **Integrated Management System** (Quality, Safety and Environment)

Consulting and training services also involve waste management and treatment, dedicated support according current laws.

These activities are integrated by reverse logistics services: handling of returns, expired goods and waste. Campoverde supports its customers in the handling and **management of WEEE** (Waste from Electric and Electronic Equipment).

## MANAGEMENT TRAINING

Campoverde provides innovative and customized tools for professional growth and development of management skills. The offered services include:

- **customized training projects**, indoor and outdoor
- **intercompany courses**
- **coaching paths**
- **educational seminars during workshops and corporate events**

The training involves the following areas:

- **communication and active listening**
- **leadership and employees management**
- **sales and marketing**

## SCIENTIFIC RESEARCH
