

*Novello companies: three generations in wood, since 1956*

## 3 BRANCHES:

### INDUSTRIAL WOOD PACKAGING

for goods of great weight and  
volume (ex. helicopters and  
industrial machinery...)

### WOODEN BUILDING

with high energetic  
performances and high living  
standards

### WOODEN ARCHITECTURAL ELEMENTS

Façades, wood floors for  
interior and exterior, roofs...

- Our companies operate in Italy and in Swiss territory
- Our factory is located in Varese: 16.500 sqm, **the largest wooden industrial building in Europe.**
- Every detail of the building fully reflects our mission of **sustainability** and **living comfort**, which is the key factor in the activity of prefabricated wooden buildings.

## ABOUT PREFABRICATED WOODEN BUILDINGS

- We use different technologies, even matching: platform frame, cross laminated timber (x-lam), straw bale technology
- We do continuous research to improve our building performances: energy, living, acoustic, sustainability...
- We build tailor-made wooden buildings: houses, elevations or expansions of pre-existing buildings, condos, public or commercial building, industrial buildings, wooden installations.
