Hands-on: Deploy ML Frameworks 101

Tuesday, 18 September 2018 14:00 (1h 20m)

In this Hands-On session we will start from bare node with deploy all necessary tools to perform Machine Learning and Data Science studies. The session will require basic knowledge of Linux operating system and UNIX shell. We'll download, deploy and install Anaconda environment where we'll install various set of Python and R based packages. We'll work with a simple Iris dataset to explore our data.
