

# QWG 2019 - The 13th International Workshop on Heavy Quarkonium

## Thursday, May 16, 2019

### Standard Model - Aula Magna (3:25 PM - 4:05 PM)

-Conveners: **Andreas Kronfeld**

time	[id] title	presenter
3:25 PM	[74] Differential top-antitop production at and beyond threshold	STAHLHOFEN, Maximilian
3:45 PM	[75] EFT approach to the pair production of unstable tops near threshold	RAUH, Thomas

### Standard Model: 2 - Aula Magna (4:30 PM - 5:10 PM)

-Conveners: **Antonio Pineda**

time	[id] title	presenter
4:30 PM	[93] The charm/bottom quark mass from heavy quarkonium at N3LO	PESET, Clara
4:50 PM	[94] Quark masses: the minimally subtracted mass and results from lattice QCD	KRONFELD, Andreas

# Friday, May 17, 2019

## Standard Model: 3 - Aula Magna (11:15 AM - 12:55 PM)

-Conveners: Simon Eidelman

time	[id] title	presenter
11:15 AM	[88] $\alpha_s$ determination from static potential: OPE with renormalon subtraction and lattice QCD	SUMINO, Yukinari
11:35 AM	[89] Two $\alpha_s$ determinations from lattice QCD	WEBER, Johannes Heinrichy
11:55 AM	[90] R measurement at KEDR	SHAMOV, Andrey
12:15 PM	[91] R measurement at BESIII	PING, Ronggang
12:35 PM	[92] Radiative Higgs decays to quarkonium	CHUNG, Hee Sok
