

Simulation Tutorial Hardware & Software Tools

13 June 2018

G. Battistoni & S.M. Valle

A common working area (if needed)

We have configured an account on the machine:

pcalien.mi.infn.it

Account: `foot_exp`

Passwd: `Fluka4Foot!`

Working area: `/disk4/Tutorial`

Software needs

FLUKA, public version (`fluka2011.2x`)

In `pcalien` `$FLUPRO` is defined and points to an area where FLUKA is installed

SHOE: master branch

In `pcalien` it is installed in `/disk4/Tutorial/shoe`

Reminder: how to download the master branch of SHOE with git

Have you a baltig account of INFN?

```
git clone (-b master) https://yourid@baltig.infn.it/asarti/shoe.git
```

Check with:

```
git branch
```

```
git status
```
