

QFC2019 - Quantum gases, fundamental interactions and cosmology

Thursday, October 24, 2019

Talks on specific topics: II (2:00 PM - 3:15 PM)

-Conveners: Angela Dora Vittoria Di Virgilio

time	[id] title	presenter
2:00 PM	[11] Discrete time crystal in a finite chain of Rydberg atoms without disorder (Q)	ROSSINI, Davide
2:25 PM	[14] On scattering amplitudes in the presence of gravity (F)	URBANO, Alfredo
2:50 PM	[16] Bootstrapped Newtonian gravity: from stars to corpuscular black holes (C)	CASADIO, Roberto

Talks on specific topics: III (4:15 PM - 5:15 PM)

-Conveners: Barbara Patricelli

time	[id] title	presenter
4:15 PM	[19] Synthesis of Majorana mass terms in low-energy quantum systems (Q)	LEPORI, Luca
4:45 PM	[21] Testing The Area Quantisation Hypothesis From Black Hole Ringdown Signals (C)	DEL POZZO, Walter
