

QFC2019 - Quantum gases, fundamental interactions and cosmology

Friday, October 25, 2019

Posters and Coffee: Poster Session (3:40 PM - 4:50 PM)

time	[id] title	presenter
3:40 PM	[1] Space-time evolution of the spin polarization for Bjorken hydrodynamical scenario.	SINGH, Rajeev
3:41 PM	[2] deformed phase space in noncommutative quantum cosmology	Dr MENA BARBOZA, Eri
3:42 PM	[25] Squeezed state metrology with Bragg interferometers operating in a cavity	Mr SHANKAR, Athreya
3:43 PM	[3] Black hole superradiance in Bose-Einstein condensates: amplification and instabilities	GIACOMELLI, Luca
3:44 PM	[22] Condensation in 2D: from nonuniversal effects to bubble traps	Mr TONONI, Andrea
3:45 PM	[12] Holographically-generated optical traps for ultracold atoms	Dr CASSETTARI, Donatella
3:46 PM	[13] Electroweak Interaction in $SU(2) \times U(1)$ Left-Right Symmetrical Model	Prof. KOSHELKIN, Andrew
3:47 PM	[10] The vacuum as a Lagrangian subspace	COLOSI, Daniele
3:48 PM	[5] Many-body physics and exotic states in Rydberg systems	Dr ANGELONE, Adriano
3:49 PM	[23] Many-Body Entanglement in Short-Range Interacting Fermi Gases for Metrology	Dr LUCCHESI, Leonardo
