INFRADEV-01-2019-2020 - *Design studies*

Support the **conceptual and technical design** of new research infrastructures, which are leading-edge user facilities of a clear European dimension and interest:

- **Conceptual and technical feasibility of *new or upgraded research user facilities*, leading to a 'conceptual or technical design report'**
- **Need to demonstrate relevance and *advancement* wrt the state-of-art as well as the addressing of *research challenges* and *RI landscape gaps***
- ***Bottom-up process, only one deadline in 2019* but budget over 2 years**
- **50% budget increase for the 2019 topic with respect to the 2017 corresponding topic**
- **EU contribution per proposal between *1-3 M€***
- **Research and Innovation Action (RIA)**
- **Very competitive topic as aimed at identifying the RIs that really have the potential to become the next generation of European world-class RI**

INFRADEV-01-2019-2020 - *Design studies*

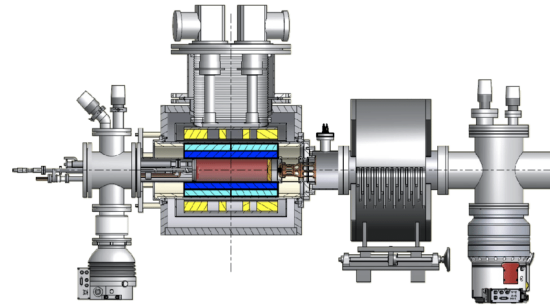

Type of action: RIA Research and Innovation Action – single stage

Planned opening date: 25 July 2019

Deadline: 12 November 2019, 17:00

Eligibility conditions for participation: at least three legal entities. Each of the three must be established in a different EU Member State or Horizon 2020 associated country. All three legal entities must be independent of each other
