

8th GOSPEL Workshop. Gas sensors based on semiconducting metal oxides:
basic understanding & application fields

Contribution ID: 36

Type: Oral

Metal oxide decorated graphene for high sensitivity applications

Friday, 21 June 2019 09:00 (20 minutes)

The full abstract is in the attachments.

Summary

Primary author: Mr RODNER, Marius (Applied Sensor Science Unit, IFM, Linköping University, Linköping, 58183, Sweden)

Co-authors: Mr EKEROTH, Sebastian (Plasma & Coatings Physics Division, IFM, Linköping University, 58183 Linköping, Sweden); Prof. HELMERSSON, Ulf (Plasma & Coatings Physics Division, IFM, Linköping University, 58183 Linköping, Sweden); Prof. YAKIMOVA, Rositsa (Semiconductor Materials Division, IFM, Linköping University, 58183 Linköping, Sweden); Mr KODU, Margus (Institute of Physics, University of Tartu, Tartu, EE50411, Estonia); Dr JAANISO, Raivo (Institute of Physics, University of Tartu, Tartu, EE50411, Estonia); Dr ERIKSSON, Jens (Applied Sensor Science Unit, IFM, Linköping University, Linköping, 58183, Sweden)

Presenter: Mr RODNER, Marius (Applied Sensor Science Unit, IFM, Linköping University, Linköping, 58183, Sweden)

Session Classification: Session 5 - Advanced materials
