MOX sensors to ensure suitable parameters of grated Parmigiano Reggiano Cheese

Friday, 21 June 2019 15:30 (20 minutes)

An array of 8 MOX gas sensors coupled with artificial neural networks has been used to assess different parameters of grated Parmigiano Reggiano cheese.

Summary

Primary authors: Prof. COMINI, Elisabetta (Department of Information Engineering, University of Brescia); Dr DUINA, Giorgio (Department of Information Engineering, University of Brescia); Prof. SBERVEGLIERI, Giorgio (Department of Information Engineering, University of Brescia); ABBATANGELO, Marco (University of Brescia)

Presenter: ABBATANGELO, Marco (University of Brescia)

Session Classification: Session 7 - New devices –Applications
