ET: An assessment of the economic impact

Thursday, 11 April 2019 17:40 (20 minutes)

We develop a systematic analysis of the sources of economic impact associated with construction and operating phases of the ET research infrastructure. Specifically, based on a I-O technique we evaluate the direct and induced impact of ET in terms of total output, value added and employment effects. We also briefly discuss and analyse other types of impact including so called social effects.

Primary authors: Prof. BIAGI, Bianca (UNISS); Mr VARGIU, Leonardo (UNISS); Prof. ATZENI, Gianfranco; Prof. DEIDDA, Luca (UNISS)

Presenter: Prof. DEIDDA, Luca (UNISS)
