

Giulia MASSOLINO

I'm Giulia Massolino, I am a science communicator working at the National Institute of Oceanography and Environmental Geophysics - OGS (Trieste, Italy). I hold a PhD degree in Energy and Environmental Engineering, a Master in Science Communication at the International School for Advanced Studies (SISSA, Trieste) and an Advanced Master degree in Sustainable Blue Growth. Since 2018 I am part of the organising team of the Advanced Master in Sustainable Blue Growth and of the Summer School on Sustainable Blue Economy. I am currently the communication officer of the EU funded DEEP BLUE project (2019-2020) and the leader of the communication work package for a proposal to the Horizon 2020 call on Cryosphere (under evaluation). I am an associate founder of the association Explora 360° that produced a VR video on scientific mission in Antarctica and a video on mental health that won the first European hackathon on VR video making (International Film Festival, Trieste, January 2018). My main interests are related to: video making, risk and crisis communication, social media management, museums and science centers.
