

## Sasa SENICA

Hello everyone!

I'm a journalist at Slovenian newspaper Delo. I write mostly about space, particularly commercial spaceflight, space exploration and space science.

There is always something going on in space, isn't it?

But I'm curious about (almost) all science topics, from CRISPR to behavioral psychology and climate change.

When writing for the online Delo, I also try to prepare videos in which long topics are presented in a short and simple manner.

In my free time I love hiking, dancing and reading.  
I'm an amateur theatre actress and director.  
I have two dogs and a few cats.

I'm looking forward to meeting you all in Erice!
