

LIST OF POSTERS

- P1 Steven Saverwyns and Alexia Coudray
Buy one get one free. Hidden compositions revealed in authenticity studies of paintings by MA-XRF
- P2 Tomasz Fiutowski, Stefan Koperny, Paulina Krupska, Bartlomiej Lach, Agata Mendys, Bartosz Mindur, Alicja Sikorska, Piotr Wiacek, Pawel Wrobel and Wladyslaw Dabrowski.
Design and performance of a macro-XRF scanner based on GEM type gaseous detector
- P3 Marco Nervo, Francesco Paolo Romano, Claudia Caliri, Anna Piccirillo, Paolo Triolo, Alessandro Gatti, Eleonora Vergallo, Michela Cardinali and Marianna Ferrero
“Costruzione del viadotto”: MA-XRF in the pictorial executive technique of Agostino Bosia
- P4 Simone Cagno, Stijn Legrand, Geert Van der Snickt, Joost Caen and Koen Janssens.
MA-XRF imaging characterizes the 16th century heraldic stained-glass panels in the Sint-Baafs Cathedral (Gent)
- P5 Ermanno Avranovich Clerici, Steven Demeyer, Geert Van der Snickt, Letizia Monico, Costanza Miliani and Koen Janssens.
X-Ray powder diffraction examination of Giotto and Cimabue fragments
- P6 Kirsten Derks, Geert Van der Snickt, Koen Janssens and Katlijne Van der Stighelen.
MA-XRF analysis of 17th-century Brussels Artists: Michael Sweerts and Michaelina Wautier
- P7 Carol Sawyer, Barbi Nicholas, Harris Billings, Sydney Collins, John Delaney, Kathryn Dooley, Travis Fullerton, Francesca Gabrieli, Christina Kargol, Leo Mazow, David Stover, Bruce Suffield, Erich Uffelman and Meredith Watson.
Multiple Imaging Modalities Applied to a Robert Henri Painting at the Virginia Museum of Fine Arts: Key XRF Element Maps from a Bruker Crono
- P8 David Juanes, Livio Ferrazza, Jose Madrid, Inmaculada Chulia and Greta Garcia.
Study of a burned wooden painting dated in XVI century by X-Ray, MA-XRF and microsampling
- P9 Anna Galli, Simone Caglio, Letizia Bonizzoni, Michele Gironda, Roberto Alberti and Marco Martini.
More than MA-XRF maps: the investigation of Chariot Race by de Chirico

- P10 Kouichi Tsuji, Momotaro Nakanishi, Ryota Ozeki and Tsugufumi Matsuyama
Development of fast XRF imaging methods
- P11 Sergio Augusto Barcellos Lins, Giovanni Ettore Gigante, Roberto Cesareo, Stefano Ridolfi and Antonio Brunetti
Testing gold leaves thickness calculation's accuracy through MC simulations and MA-XRF scanning
- P12 Magdalena Iwanicka, Tatiana Matwij, Magdalena Kowalska, Marco Colombo and Piotr Targowski
Macro XRF survey of a group of 20th century paintings from Muzeum Sztuki in Łódź, Poland
- P13 Barbara Łydzba-Kopczyńska, Magdalena Kowalska, Marco Colombo, Magdalena Iwanicka and Piotr Targowski
Combining Macro-XRF and OCT techniques in the authentication studies of the painting attributed to Michael Willmann
- P14 Giovanni Buccolieri, Alfredo Castellano, Vito Iacobellis, Fabrizio Vona and Alessandro Buccolieri
The Medieval door in Monte Sant'Angelo: characterization by EDXRF analyses
- P15 Marta Manso, Camila Mortari, António Dias, Lurdes Esteves, Alexandre Pais and Maria Luísa Carvalho
μXRF-scanning in the study of Portuguese decorative tiles
- P16 Marco Colombo, Brunhilde Thybusch, Friederike Schuett, Samuel Fickinger, Leslie Zimmermann, Jochen Sander, Peter Hoffmann and Wolfgang Ensinger
Georg Flegel under the lens of non-invasive techniques
- P17 Gwen Tauber, Annelies van Loon, Susan Smelt, Rob Erdmann, Francesca Gabrieli, Victor Gonzalez, John Delaney, Ernst van de Wetering and Peter Schatborn
The Genesis of Rembrandt's 'Denial of St. Peter': a complementary analytical approach
- P18 Joaquim Assis, Danilo Mansur, Diogo Costa, Raysa Nardes, Ramon Santos, Tiago Andrade, Marcelo Lemos, Marcio Miquelino and Marcelino Anjos
Pigment analysis of a nineteenth century prayer book (litography) using the XRF technique
- P19 Jaroslav Valach, Jan Bryscejn and Michal Vopálenký
A simple adaptation of a handheld XRF device for mapping applications in artwork analysis and documentation

- P20 Dimitrios Anagnostopoulos, Stefanos Papagiannis, Anastasios Asvestas and Anastasia Tzima
Scanning XRF for coins characterization
- P21 Marcie Wiggins, Aniko Bezur, Roxane Sperber and Robert Wheeler
MA-XRF imaging of a Japanese lacquer tray to identify metal alloys and an annular eclipse
- P22 Gianluca Poldi, Michele Gironda, Falk Reinhardt and Roald Tagle
XRF-mapping to detect metalpoints in drawings. A study on Leonardo da Vinci and his pupils
- P23 David Giovannacci, Marie Radepont, Oulfa Belhadj, Anne Michelin, Kilian Laclavetine, Aurélie Tournié, Christine Andraud, Kamel Mouhoubi, Jean-Luc Bodnar and Witold Nowik
XRF and IR imaging study of superimposed paintings on wooden vault of the church in Le Quillio (France)
- P24 Kristina Mösl, Matthias Alfeld and Ina Reiche
Variable blue and yellow pigments used by Caspar David Friedrich in different creative periods revealed by in situ XRF imaging
- P25 Catherine Defeyt, Manon Rigoreau, Taos Guyot, Francisca Vandepitte and David Strivay
Survey on current artists daylight fluorescent paints
- P26 Ahmed Sallam and Yoko Taniguchi
Identification of Materials Used in Roman Over-Paintings in Cross Section at the Luxor Temple and Plaster of Dendera Temple, Egypt
- P27 Ahmed Hassan
Application of Smart Nano-Composite for Consolidation of Roman Mural painting (3rd-5th century), Egypt
- P28 Ahmed Hassan
The Chromatic Changes of Egyptian Blue in Mural and Oil Painting
- P29 Danilo Pavone, Claudia Caliri and Francesco Paolo Romano
3D virtual modelling of elemental distribution images in painted artworks by combining rotational MA-XRF scanning with Structure for Motion (SfM) photogrammetry

**MA-XRF scanning in Conservation, Art and Archeology
Catania, October, 15-16, 2019
Museo Diocesano**

- P30 Claudia Caliri, Martina Giuffrida, Andreas Germanos Karydas, Lighea Pappalardo, Danilo Pavone, Giulia Privitera, Francesca Rizzo, Martina Ursino and Francesco Paolo Romano
New developments on the mobile LANDIS-X multi-technique X-ray scanner: combining MA-XRF, angular scanning XRF and XRD in painting investigation
- P31 Stijn Legrand, Geert Van der Snickt, Natalia Ortega Saez and Koen Janssens
Possibilities and limitation of MA-XRF examination during the examination of unusual artefacts
